## PROFESSIONAL SUMMARY

Salesforce Developer specializing in Apex development, Lightning Web Components (LWC), SOQL/SOSL, and scalable enterprise CRM solutions. Experienced in building secure, high-performance applications through declarative automation, asynchronous processing, and modern deployment practices.

## EXPERIENCE

**Cognizant** Sep 2024 – Present  
**Salesforce Developer | *Programmer Analyst*** Noida

- Delivered custom Salesforce solutions using Apex and Lightning Web Components (LWC), including feature enhancements and production issue resolutions for a global pharmaceutical client, maintaining stable system performance for 600+ active field representatives across multiple regions.
- Developed scalable Apex solutions using Triggers, Handler Frameworks, reusable utility classes, and Async Apex; optimized SOQL/SOSL for high-volume data processing while applying bulkification, governor limit, and unit testing best practices.
- Configured Validation Rules and Lightning Flows to enforce business logic, while implementing Profiles, Permission Sets, Roles, Sharing Rules, and CRUD/FLS controls to strengthen Salesforce security and reduce recurring data inconsistencies.
- Performed bulk data migration, validation, and cleanup using Data Loader; implemented custom features, enhancements, and bug fixes based on business requirements within Agile development cycles.
- Deployed Salesforce customizations from sandbox to production using Change Sets and VS Code (SFDX), contributing across development, testing, release management, and post-deployment validation.

**DIT-Technology Business Incubator** June 2021  
**Web Development Intern** Dehradun

- Developed responsive web interfaces using HTML, CSS, and JavaScript, while using Git and GitHub for version control and collaborative development workflows.
- Built data-driven web applications using Python, Streamlit, and SQL, gaining hands-on experience in frontend development, data handling, and application development.

## PROJECTS

**Go-Grocery Salesforce Application** *Github Link*

- Built a grocery ordering application on Salesforce Experience Cloud, enabling external users to register, browse products, manage carts, and place orders using Lightning Web Components.
- Designed real-time inventory and order management using Apex-powered backend services and Lightning Web Components, ensuring dynamic product availability, quantity updates, and admin-controlled workflows.

## SKILLS

**Salesforce Technologies:** Lightning Web Components (LWC), Async Apex (Batch, Queueable, Future Methods), Apex Test Classes, Code Coverage, Lightning Pages, Controllers, Triggers, Custom Objects, Validation Rules, CRUD/FLS, Lightning Flows, Dashboards, Reports, Salesforce CLI, Salesforce Integrations (REST API)

**CRM & Development Tools:** Salesforce Platform, Sales Cloud, Experience Cloud, Data Loader, Salesforce Workbench, JIRA, Confluence, Postman, Sandbox

**Languages:** Apex, SOQL, SOSL, JavaScript, SQL, Java, Python, C++

**Professional Skills:** Problem Solving, Analytical Thinking, Stakeholder Communication, Cross-functional Collaboration, Troubleshooting, Agile Development

## CERTIFICATIONS

Salesforce Certified Platform Administrator | Salesforce Certified JavaScript Developer | Salesforce Certified Platform App Builder
